Publications

- Zhao Zhenning and Liu Hongkui. "Analysis of Monetary Policy and Social Welfare in the Context of International Capital Flow." *World Economic Research* 12 (2017): 8.
 - This paper discussed the influence of the endogenous capital flow on an open economy, comparing several different monetary policies (Standard Taylor rule, investment return considered Taylor rule, and PEG rule) In the game of two large open economies, the independent monetary policy based on the real investment rate of return will change the capital structure, delay the conduction of the international economic crisis, and hence lead to the least welfare loss among three candidate monetary policies.

Working Papers

- State Dependent Sticky Information and Uncertainty, Preliminary
- Job to Job Transition and Financial Frictions, Preliminary
